I've always been curious about how digital services and web applications work. This curiosity led me to pursue a degree in IT, where I built a strong foundation in programming and databases. Currently, I am learning Python and looking for opportunities to apply what I've learned in real-world projects.

---

## EDUCATION

### [Taitotalo](#)

Python Programming

Helsinki, FI

Nov 2024 – June 2025

### [Haaga-Helia University of Applied Sciences](#)

Bachelor's degree in business information technology, GPA 4.69

Helsinki, FI

Jan 2021 – June 2024

---

## SKILLS SUMMARY

- **Languages** Python | JavaScript | TypeScript | Java | SQL
- **Libraries** React | Redux | Material UI | Tailwind CSS | Express
- **Testing** Jest | Selenium | Robot Framework
- **Tools & Platforms** Git | VS Code | Eclipse | GitHub | Jira | Trello
- **Soft Skills** Excellent Communication | Collaboration | Adaptability | Problem Solving

---

## WORK EXPERIENCE

### Web Developer | [Vesko](#)

Sep 2024 – Dec 2024

- Built **10+ UI components** and layouts using React TypeScript
- Migrated **1,000+ lines of code** to a new maintainable codebase
- Redesigned layouts with Tailwind CSS improving responsiveness by **15%**

### Full Stack Developer Trainee | [Integrify](#)

May 2022 - Oct 2022

- Gained hands-on experience in full-stack development, with **React, Redux, Node.js and MongoDB**
- Managed and collaborated on **3+ git repositories**, utilizing **branching, pull requests, and merge workflows**
- Generated and maintained API documentation using Swagger, ensuring clear and comprehensive technical specifications

---

## PROJECTS

### Softala | [Frontend](#), [Backend](#) | JavaScript, TypeScript, React, Material UI, Express, Node, SQL

- Collaborated with a cross-functional **team of 30 developers** to deliver a feature-rich full stack application
- Implemented API testing with VS Code Rest Client, **improving development efficiency and workflow**
- Refactored the code base and reduced code **redundancy by 60%**
